PREFACE.

In compliance with the request of a deputation of Yacht Owners and others interested in Yachting, the Committee of Lloyd's Register of Shipping determined in 1877 to provide a Register for the faithful and accurate Registration of Yachts and to adopt Rules and Regulations for the Classification of this description of vessel.

The Register of Yachts, which is printed solely for the use of Subscribers, was first issued in 1878, and has since been published annually, except during the years 1916–17–18. A supplement containing additions and corrections is usually issued during the year.

The Register of Yachts contains the names, particulars and characters of Yachts classed by the Society, together with the particulars of other Yachts which are considered to be of interest to Subscribers, a List of Yachts of the International Rating Classes built since the 1st January, 1920, a List of Yacht and Sailing Club Officers and illustrations of their respective Flags, an illustrated List of the Flags of Yachts, a List of the Names and Addresses of Yacht Owners, and much other information of interest to Yachtsmen.

Of American and Canadian Yachts particulars of only the larger vessels are included in the Book, and a separate Register containing a complete List of Yachts of the United States, Canada, the West Indies, and South America is published from the Society's Office at 17, Battery Place, New York.

Information for the Register is obtained from the Society's Surveyors, the Registrar General of Shipping, Yacht Owners, Builders, Designers, and from various other sources. It would be appreciated if Yachtsmen, and others interested in the book, would assist the Committee in making it as complete and accurate as possible by giving early intimation of any changes of ownership, by forwarding any other information of interest to the compilers, and by replying promptly to any enquiry which may be addressed to them in connection with the book from the Society.

The Society undertakes, upon request of the responsible parties, the survey of Yachts during construction or of Yachts already built, with a view to Classification being assigned by the Committee of Lloyd's Register. Particulars can be obtained upon application to the Head Office, or to any of the Society's Surveyors.

71, Fenchurch Street, London, E.C.3, *May*, 1927.

PRÉFACE.

Pour satisfaire à la demande d'une délégation de propriétaires de yachts, et d'autres personnes intéressées dans la navigation de plaisance, le Comité du Lloyd's Register of Shipping décida, en 1877, de publier un Registre pour l'enregistrement fidèle et exact des yachts, et d'adopter des Statuts et Règlements pour la Classification des navires de cette catégorie.

Le "Yacht Register," qui est publié uniquement pour l'usage des abonnés, a paru pour la première fois en 1878, et depuis lors, il a été publié annuellement, exception faite des années 1916-17-18. Un supplément donnant les additions et corrections apportées à l'ouvrage est ordinairement publié dans le courant de l'année.

Le "Yacht Register" contient les noms et les cotes, avec d'autres renseignements, des yachts cotés par la Société, ainsi que les noms des autres yachts, avec des renseignements qui sont considérés être de nature à intéresser les abonnés. Il contient, en outre, une liste des yachts de la Jauge Internationale, construits depuis le 1er Janvier, 1920 ; une liste des Officiers des yacht clubs et sociétés de régates, avec les dessins coloriés de leurs pavillons respectifs ; une liste illustrée des guidons particuliers des yachts ; une liste des propriétaires de yachts avec leurs adresses, et beaucoup d'autres renseignements utiles aux personnes intéressées dans la navigation de plaisance.

Pour ce qui concerne les yachts américains et canadiens, le "Yacht Register" ne donne des renseignements que sur les plus grands des yachts battant ces pavillons. Un Registre séparé est publié par les Bureaux de la Société, 17, Battery Place, New York, contenant une liste complète des yachts des États-Unis, du Canada, des Indes Occidentales et de l'Amérique du Sud.

Les renseignements qui figurent dans le "Yacht Register" proviennent des Inspecteurs de la Société, du Département de la Marine, Gouvernement Britannique, des propriétaires de yachts, des constructeurs, des dessinateurs et d'autres sources diverses. Le Comité du Lloyd's Register serait très reconnaissant aux Yachtsmen et autres personnes intéressés dans l'ouvrage, s'ils voulaient l'assister à rendre le livre aussi complet et exact que possible, en signalant de bonne heure les changements qui se sont produits dans la propriété des yachts, ou tout autre renseignement de nature à intéresser les éditeurs, et en répondant promptement aux demandes que la Société pourrait leur adresser en connexion avec le livre.

La Société entreprend, à la demande de personnes responsables, la surveillance des yachts pendant leur construction, ou l'inspection des yachts déjà construits, en vue de l'obtention d'une cote, assignée par le Comité du Lloyd's Register. S'adresser, pour tout renseignement à ce sujet, au Siège de la Société à Londres ou aux Inspecteurs régionaux.

REGISTRO ITALIANO.

NOTICE.

In pursuance of the wishes of the Italian Government, an amalgamation was effected between the two Italian Classification Institutions, previously known as the Registro Navale Italiano, with headquarters at Genoa, and the Veritas Adriatico, with headquarters at Trieste, in order to establish one Italian register of shipping, under the name of the Registro Italiano.

An Agreement, which came into operation on the 1st April, 1922, has been arrived at between the new Registro Italiano and Lloyd's Register, with the object of facilitating the classification of vessels with both Societies in the interests of shipowners, shipbuilders and underwriters.

Under the terms of this Agreement, Italian shipowners, while securing the national classification for their vessels, will, at the same time, be in a position to have Lloyd's Register class with as little inconvenience and expense as possible.

With this object, the Agreement provides that each Institution will give every facility for the assignment of its classification to vessels classed, or intended to be classed, by the other Society, provided the standard of strength and security is not inferior to that required by its own Rules, each Institution reserving to itself the right of confirming the class by means of surveys by its own Surveyors.

In order to obviate delays and inconvenience to shipowners and shipbuilders, the surveys of the two Societies will, as far as possible, be held simultaneously, and the Surveyors of both Registers are required to co-operate in entire harmony, and to hold jointly the surveys which they have to carry out.

KEY TO THE REGISTER.

KEY TO LLOYD'S REGISTER OF YACHTS

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12.

(All Abbreviations employed in the Register are explained in the Alphabetical Key, page 77.)

100A — Character of Yachts built of Steel or Iron in accordance with or equal to the Society's Rules and Tables.

90A — Character of Yachts built of Steel or Iron in some respects deficient of the requirements of the Society's Rules for the 100A class.

A — Without a numeral prefixed, character assigned to Iron and Steel Yachts already built to which the Society's Rules do not apply.

A — Character of Wood or Composite built Yachts of the first class. The figures prefixed to the character thus, 18 A, 12 A, indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses thus, (17)A, C(11), indicate the expired term of years — originally if on the first line, and on continuation or restoration if on lower lines.

A — Without a term of years indicates that the Yacht, though not built according to the Society's Rules, is considered worthy of the class assigned.

Lv A1* Lv A1 — Characters assigned by the Underwriters' Register for Iron Vessels, now amalgamated with Lloyd's Register.

R — Character of Yachts built in accordance with the Rules for Yachts of the International Rating Classes both as regards scantlings and equipment. The figures prefixed to the character thus, 16 R, 14 R, in the case of Wood and Composite Yachts, indicate the term of years for which the Yacht is at present classed.

1 — The figure 1 after a character signifies that the Yacht is well and efficiently equipped (*see* Equipment Tables of the Society's Rules for Yachts).

A line thus — after the letter A, A or A signifies that the equipment is *not* in accordance with the Society's Rules.

In the case of Yachts classed R, the figure 1 for equipment is not employed, the equipment being required in these cases to be in accordance with the Rules for Yachts of the International Rating Classes before the class is assigned.

† — Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the Society's Rules for the same.

The figures under a Character denote the date when the Yacht was last Surveyed by the Society's Surveyors.

When the port and date of Survey only appear, without the Yacht's Character, the Character has expired or been withdrawn because a Survey prescribed in the Society's Rules has not been held, or on account of non-payment of fees.

✠ — This sign before a Character thus, ✠100A1, denotes that the Yacht has been built under Special Survey.

✠ — This sign before a classification record of Machinery thus ✠LMC ✠NE&B indicates that the Engines and Boilers or both (according to the record which follows) have been built under Special Survey.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12—*continued.*

3,23 — A black line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of reported defects, the Yacht was not entitled to a Character.

3,23 — A red line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of non-compliance with the Society's Rules as regards Surveys, the Yacht was not entitled to retain her Character therein.

... This sign indicates that the Yacht's class was withdrawn from the Society's Register of Yachts at Owner's request.

When the eleventh and twelfth Columns are left blank, the Yacht has never been Classed in the Society's Register of Yachts.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS.

Tonnage (column 4). The Thames Measurement tonnage appears in the Register in the case of every Yacht, and is printed below the official tonnages where these tonnages are given. The rule for computing the Thames Measurement tonnage is as follows:—From the length (measured from the fore side of stem to the after side of sternpost on deck) deduct the breadth, multiply this result by the breadth, and that product by the half breadth, and divide by ninety-four.

In the cases of Yachts which are officially registered, the official registered tonnage measured according to the law of the country to which the Yacht belongs is recorded in type like that shown at the side hereof.

204·51 (Net)
546·65 (Gross)

For some foreign Yachts, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:—

204·51 (Net)
546·65 (Gross)

Dimensions (column 5). The dimensions which are printed on the top line are those employed for calculating Thames Measurement tonnage. In the case of yachts classed by Lloyd's Register, these are obtained from the Society's Surveyor's First Entry Report of Survey; where yachts are not classed by the Society, but are officially registered, the dimensions are obtained from the vessel's Certificate of Registry. In other cases the dimensions are as given on returns received from owners, builders, etc.

The **length** entered on the top line is the length measured from fore side of stem to aft side of stern-post on the range of the upper deck, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

The length entered on the second line is the length over all.

The length entered on the third line is the length on the water line.

The **breadth** recorded is the extreme breadth.

The **depth** is taken from the top of floors to top of upper deck beams amidships.

The **headroom** is the maximum clear space from top of floor or cabin deck to underside of beams at upper deck or coach roof *in way of Owner's accommodation* (*saloon*).

The **draft** is the maximum draft to bottom of keel.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS—*continued.*

Date of Build (column 7). The date of build recorded in the Register for yachts built under the survey of the Society's Surveyors, is the date when the yacht was launched, except for yachts built during 1903 and subsequently, in which cases the last date of survey for first entry of classification is recorded when such survey is completed within six months of the date of launching, but when the first entry survey is not completed within that period, six months later than the date of launching is then recorded as the date of build.

The date of build of engines and boilers is only recorded where the same differs from the date of build of the yacht, and, in these cases, the date appears in column 8.

Internal Combustion Engines (column 8)—

Alcohol Motor indicates an internal combustion engine using alcohol as fuel.

Gas Engine indicates an internal combustion engine using gas as fuel.

Oil Engine indicates an internal combustion engine using heavy oil such as Astatki, Mazut, etc., as fuel.

Paraffin Motor indicates an internal combustion engine using refined oil with a flash point higher than 73° F., such as Paraffin oil, Kerosene, Solar oil, etc., as fuel.

Petrol Motor indicates an internal combustion engine using highly volatile oils, such as Benzoline, Gasoline, Petrol, etc., as fuel.

Nominal Horse Power (column 8). The formulæ from which the Nominal Horse Powers of Steam Reciprocating Engines are calculated are :—

1. In cases of yachts in which the particulars of boiler pressures and surfaces are known :—

$$NHP=\frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is below 160lb.

$$NHP=\frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is 160lb or above.

For determining the Nominal Horse Power of Steam Turbine Engines $\frac{SHP}{6}$ is to be substituted in the above formulæ for $\frac{D^2\sqrt{S}}{100}$ where SHP. is the total Shaft Horse Power.

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known :—

$$NHP=\frac{D^2\sqrt{S}}{100}$$ for Triple and Quadruple Expansion Engines.

$$NHP=\frac{D^2\sqrt{S}}{120}$$ for Compound Engines.

$$NHP=\frac{D^2\sqrt{S}}{130}$$ for Single Engines.

In the above Rules, D = diameter of L.P. Cylinder in inches.
S = Stroke in inches.
H = Heating surface in square feet.
P = Working pressure in lb per square inch.

In vessels fitted with Diesel Engines :—

$$NHP=\frac{C\times N\times D^2}{\frac{S}{D}+50}$$

where NHP=the Nominal Horse Power.
N=the number of power cylinders.
D=the diameter of the power cylinders in inches.
S=the stroke of the piston in inches. In the case of the opposed piston type of Diesel engines S is half the combined stroke of the pistons.
C= 5 for Engines of the 4 S.C.S.A. type.
=10 for Engines of the 4 S.C.D.A. type.
= 9 for Engines of the 2 S.C.S.A. type.
=18 for Engines of the 2 S.C.D.A. type.
=16 for Engines of the 2 S.C.S.A. opposed piston type.

In vessels fitted with internal combustion engines other than Diesel type :—

$NHP=\frac{BHP}{3{\cdot}5}$, where BHP is the Brake Horse Power at full power.

Asterisk * (column 9) before an Owner's name indicates that he has obtained the Board of Trade Certificate of competency as Master.

TABLE EXPLICATIVE CONCERNANT LE REGISTRE DES YACHTS.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12.

Toutes les abréviations, employées dans le Registre, ont leur définition dans la Table Explicative. (*Voir* page 85.)

100A — Cote des Yachts, en fer ou en acier, construits conformément, ou d'une façon équivalente, aux Règlements et aux Tables de la Société.

90A — Cote des Yachts, en fer ou en acier, construits, sous certains rapports, plus légèrement que les Règlements de la Société ne l'indiquent pour la cote 100A.

A — Non précédé d'un coefficient, est une cote pour les Yachts, en fer ou en acier, déjà construits et auxquels les Règlements de la Société ne s'appliquent pas.

A — Première cote des Yachts, en bois ou composite, dont l'armement est bon et suffisant. Le coefficient qui précède la cote, comme-ci : 18 A, 12 A indique le nombre d'années pour lesquelles le Yacht est actuellement coté. Le coefficient, placé entre parenthèses, comme-ci : (17) A C (11) indique les périodes expirées pour lesquelles le navire avait été coté. Placé à la première ligne, le coefficient indique la période originelle, aux lignes suivantes les périodes de continuation ou de restauration.

A — Sans terme d'années, indique que le Yacht, quoique n'étant pas construit conformément aux Règlements de la Société, est considéré comme méritant la cote assignée.

Lv A1* Lv A1 — Cotes assignées pour les navires, en fer, par l'"Underwriters' Register" actuellement fusionné avec le "Lloyd's Register."

R — Cote des Yachts construits conformément aux Règlements de la jauge internationale tant comme échantillons que comme armement. Le coefficient qui précède la cote, comme-ci : 16 R, 14 R, dans le cas des Yachts en bois ou composite, indique le nombre d'années pour lesquelles les Yachts sont actuellement cotés.

1 — Le chiffre 1, à la suite d'une cote, indique que le Yacht a un armement bon et suffisant. (*Voir* Tables de l'Armement des Règlements de la Société pour les Yachts.)

Le chiffre 1, à la suite des lettres A, A ou A, indique que l'armement est conforme ou équivalent aux Règlements de la Société.

— — Ce signe, à la suite des lettres A, A ou A indique que l'armement n'est pas conforme aux Règlements de la Société.

Pour les Yachts cotés R, il n'est pas fait usage du chiffre 1 pour l'armement qui doit, obligatoirement, être conforme aux Règlements de la jauge internationale avant que la cote puisse être assignée.

† — Ce signe, précédant une cote, indique que le Yacht est aussi coté dans le "Register Book," pour les navires marchands, et que ses échantillons répondent aux Règlements du "Lloyd's Register" pour cette dernière catégorie de navires.

Les chiffres, placés sous une cote, indiquent la date de la dernière visite passée par les Inspecteurs de la Société.

Quand le port et la date de visite figurent sans la cote du Yacht, cela indique que la cote est expirée ou qu'elle a été rayée, soit parce qu'une visite prescrite par les Règlements de la Société n'a pas été passée, soit parce que les honoraires n'ont pas été payés.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12—*suite.*

✠ Ce signe, précédant une cote, comme-ci : ✠100A1 indique que le Yacht a été construit sous surveillance spéciale.

✠ Ce signe, précédant une annotation de classification de Machines, comme-ci : ✠LMC ✠NE&B indique que les Machines, ou les Machines et les Chaudières, suivant l'annotation, ont été construites sous surveillance spéciale.

3,23 Une ligne noire, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de défectuosités signalées.

3,23 Une ligne rouge, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de dérogations aux Règlements de la Société en ce qui concerne les visites.

... Ce signe indique que la cote du Yacht a été retirée du Registre des Yachts de la Société à la demande du propriétaire.

Quand les Colonnes 11 et 12 sont laissées en blanc, cela indique que le Yacht n'a jamais été coté dans le Registre des Yachts de la Société.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS.

Jauge (colonne 4). La jauge de la Tamise figure dans le Registre pour chaque Yacht et est imprimée au-dessous des jauges officielles, quand ces jauges sont données. La règle, pour calculer la jauge de la Tamise, est la suivante :— Prendre la longueur sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot et en déduire la largeur, puis multiplier le résultat obtenu par la largeur et ce dernier résultat de nouveau par la moitié de la largeur et diviser par quatre-vingt-quatorze.

Pour les Yachts ayant un acte de Nationalité, la jauge officielle, mesurée suivant la loi de la nation à laquelle les Yachts appartiennent, figure en caractères comme ci-contre : 204·51 (Net) 546·65 (Brut)

Pour quelques Yachts étrangers, la jauge qui figure a été mesurée conformément aux Règlements Britanniques et acceptée sous la Loi Britannique. Dans ce cas, la jauge figure en italique, comme ci-contre : *204·51* (Net) *546·65* (Brut)

Dimensions (colonne 5). Les dimensions qui sont imprimées sur la ligne supérieure, sont celles qui servent pour le calcul de la Jauge de la Tamise. Dans le cas des yachts qui sont cotés auprès du Lloyd's Register, les dimensions sont celles qui figurent sur le Rapport de l'Inspecteur de la Société pour la première inscription de classification ; pour les yachts qui ne sont pas cotés auprès de la Société, mais qui possèdent un Acte de Nationalité, les dimensions sont prises sur le certificat d'enregistrement du navire. Dans les autres cas, les dimensions sont celles qui sont données sur les états reçus des Propriétaires, des Constructeurs, &c.

La **longueur** qui figure sur la ligne supérieure est mesurée, sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot, sauf pour les yachts non cotés, qui sont enregistrés officiellement comme navires anglais, et, dans ce cas, c'est la longueur enregistrée qui est indiquée.

La longueur indiquée sur la seconde ligne est la longueur extrême.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

La longueur donné sur la troisième ligne est la longueur à la ligne de flottaison.

La **largeur** qui est indiquée est l'extrême largeur.

Le **creux** est mesuré, au milieu du navire, depuis le dessus des varangues jusqu'au dessus des barrots du pont supérieur.

La **hauteur** sous barrots est la hauteur maxima entre le haut des varangues ou du parquet de la cabine jusqu'à la partie basse des barrots du pont supérieur ou du rouf **par le travers de l'amménagement du propriétaire (salon).**

Le **tirant d'eau** est le tirant d'eau maximum jusqu'au bas de la quille.

Date de Construction (colonne 7). La date de construction, qui figure dans le Registre pour les Yachts construits sous la surveillance des inspecteurs de la Société, est celle du lancement, si les Yachts ont été construits avant 1903. Pour les Yachts, construits depuis 1903 inclusivement, c'est celle de la dernière visite d'inspection pour l'entrée en cote, à condition que la dite visite soit passée dans les six mois qui suivent la date du lancement. Si l'inspection, pour l'entrée en cote, n'est pas terminée durant la période stipulée, la date de construction prendra cours six mois après le lancement.

La date de construction des machines et des chaudières ne figure que lorsqu'elle diffère de celle de la construction du Yacht, et dans ce cas elle est donnée dans la colonne 8.

Yachts Automobiles (colonne 8) :—

"**Alcohol Motor**" indique une machine à combustion interne, utilisant l'alcool comme combustible.

"**Gas Engine**" indique une machine à combustion interne, utilisant le gaz comme combustible.

"**Oil Engine**" indique une machine à combustion interne, utilisant des huiles lourdes comme combustible, telles que Astatki, Mazut, etc.

"**Paraffin Motor**" indique une machine à combustion interne, utilisant comme combustible des huiles raffinées ayant un point d'inflammation supérieur à 23° C., telles que pétrole, kerosene, solar, etc., etc.

"**Petrol Motor**" indique une machine à combustion interne, utilisant des huiles extrêmement volatiles comme combustible, telles que Benzoline, Gazoline, Essence, etc.

Force en Chevaux nominaux (colonne 8) :—

1°. Pour les Yachts pourvus de machines alternatives à vapeur, si les pressions et les surfaces de chauffe sont connues :—

$$\text{NHP}=\frac{\text{P}+340}{1000}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions au-dessous de 160 livres.

$$\text{NHP}=\frac{\text{P}+590}{1500}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions de 160 livres et au-dessus.

Pour déterminer la force en chevaux nominaux des turbines à vapeur, $\frac{\text{SHP}}{6}$ est à substituer, dans formule ci-dessus, à $\frac{\text{D}^2\sqrt{\text{S}}}{100}$, où SHP est la force totale en chevaux à l'arbre.

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{\text{H}}{12}$ à $\frac{\text{H}}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{100}$$ Machines à Triple et Quadruple expansion.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{120}$$ Machines Compound.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{130}$$ Machines Simples.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

Dans les formules ci-dessus

D = diamètre en pouces du Cylindre B.P.
S = Course du piston en pouces.
H = Surface de Chauffe en pieds carrés.
P = Pression de travail en livres par pouce carré.

Pour les navires pourvus de moteurs Diesel :—

$$NHP = \frac{C \times N \times D^2}{\frac{S}{D} + 50}$$

où NHP = Puissance en chevaux nominaux.
N = Nombre de cylindres.
D = Diamètre des cylindres en centimètres.
S = Course de piston en centimètres ; dans le cas de moteurs Diesel du type à pistons opposés, S est la moitié de la course combinée des pistons.

C = 0,775 pour les moteurs à 4 temps simple effet.
= 1,55 pour les moteurs à 4 temps double effet.
= 1,395 pour les moteurs à 2 temps simple effet.
= 2,79 pour les moteurs à 2 temps double effet.
= 2,48 pour les moteurs à 2 temps simple effet, à pistons opposés.

Pour les navires pourvus de machines à combustion interne, autres que des moteurs Diesel :—

$NHP = \frac{BHP}{3{\cdot}5}$ formule dans laquelle BHP représente les chevaux en frein à toute force.

* Un astérisque (colonne 9) devant le nom d'un propriétaire indique qu'il a obtenu du "Board of Trade" un certificat de capacité comme patron.

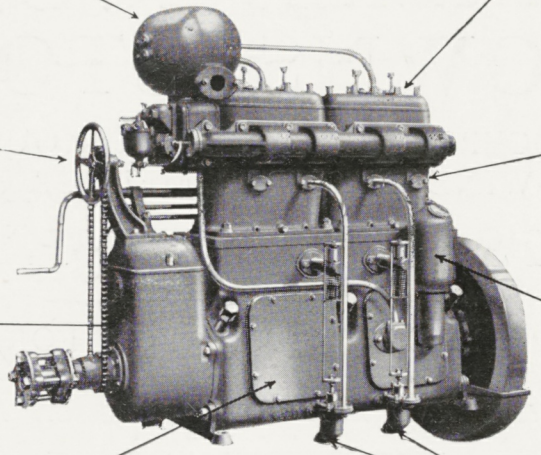
"KELVIN-SLEEVE"
MARINE ENGINES

SPECIAL FEATURES

Silencer, "KELVIN" System; cooling water mixes with exhaust gas.

Detachable Cylinder Heads; fully water-jacketed.

Wheel Reverse Control; gentle clutch engagement; positive withdrawal.



Cylinders water-jacketed right down to Crankcase.

Silent Reverse Gear; wheels run in oil bath.

Piston type lubricator, giving measured quantity of oil.

Large Crankcase Doors; pistons can be removed without disturbing cylinders

Plunger Water Pumps, below water line; no internal springs.

Single Sleeve Valves (Burt McCollum Patent) in place of the usual Poppet Valves. The Sleeve Valves are absolutely noiseless in action and remain so.

Waterproof Magneto with self-contained automatic impulse starter; enclosed Governor acting upon engine throttle.

"KELVIN-SLEEVE" Engines are made in three groups (each providing a 2 cylinder and a 4 cylinder model) covering a range of from 6 H.P. to 72 H.P.

THE "A" MODELS, light weight, moderate speed, suit launches, shallow draught boats, and small sailing yachts.

THE "B" MODELS, medium weight, medium speed, suit heavy launches, cabin cruisers and large sailing yachts.

THE "C" MODELS, heavy weight (reducing gear unnecessary), suit heavy displacement craft of all types, such as large cabin cruisers and large auxiliary sailing yachts.

"KELVIN" FOLDING PROPELLERS are necessary for auxiliary yachts if maximum efficiency under sail is to be maintained.

The "KELVIN" folding propeller, as originated and developed by the Bergius Company, has the following important points of superiority over propellers of the usual reversible type:

(1) The blades are strong and rigid.
(2) Folding and opening operations are automatic.
(3) Higher propelling efficiency. (The blades are of true pitch.)

Made in two types—reversible and non-reversible.

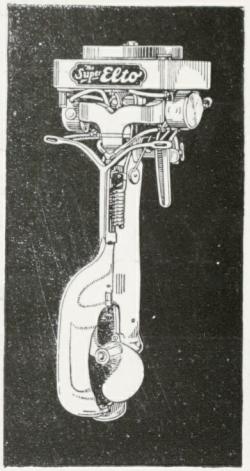
A Powerful and Portable Yachting Auxiliary—

EVERY YACHTSMAN NEEDS THE 1927 LIGHT-WEIGHT TWIN CYLINDER

The Super Elto "Starts with a quarter turn" *OUTBOARD MOTOR*



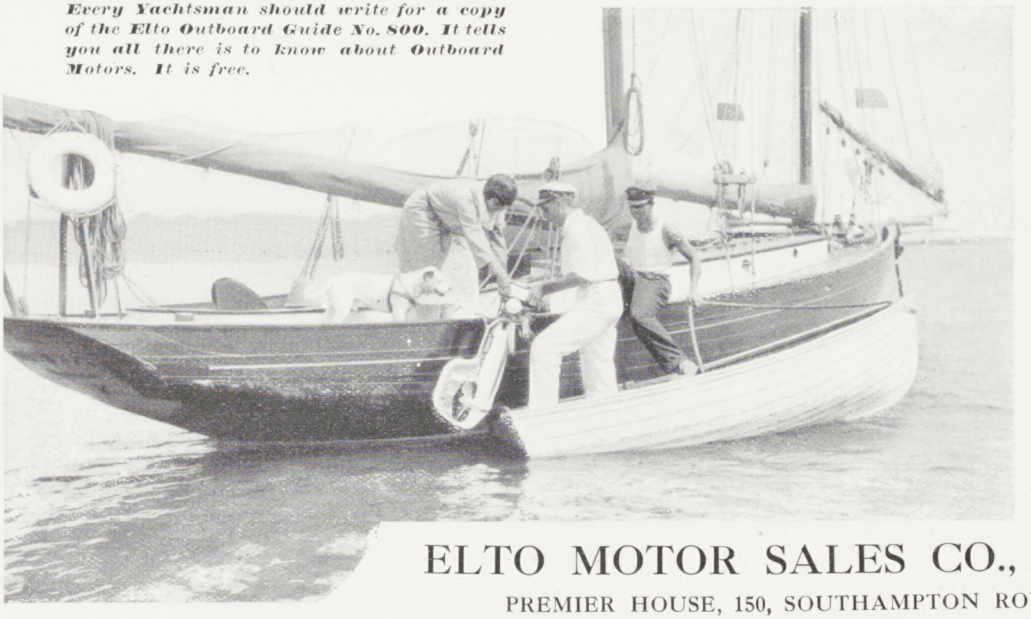
IT will tow large sailing yachts and also provides auxiliary power when clamped on the transome of small yachts.

The Super Elto can be instantly fixed to any type of boat, yacht, dinghy, punt or canoe.

For speedy runs between moorings and land, and for exploring the beauties of shallow waters, which is impossible with your larger boat, the Elto is invaluable. It gives speed on an ordinary rowing boat and is capable of consistent running for long periods under heavy loads.

SILENT — SPEEDY — SAFE

Every Yachtsman should write for a copy of the Elto Outboard Guide No. 800. It tells you all there is to know about Outboard Motors. It is free.



YOU WILL NEVER LIE BECALMED WITH AN ELTO.

Exclusive ELTO features

It has EASY STARTING, with a QUARTER TURN flip of the FLY WHEEL—THE MOST IMPORTANT quality in an outboard. The IGNITION is ENTIRELY WATERPROOF. There is RUDDER STEERING which means PERFECTLY SAFE TURNING at all speeds. You can STEER, SPEED UP, SLOW DOWN or STOP from any part of the boat. It has SILENT, ODOURLESS, UNDERWATER EXHAUST. For use in salt or fresh waters.

To secure a sense of safety and independence when evening is approaching you need a "NIFE" battery or a "NIFE" Hand Lamp on board.

Nickel steel alkaline batteries are the only ones worth considering, for they have no acid fumes and can stand idle without injury; but when buying ask for "NIFE" British made—cheapest and best.

The "PAGET" RACE STARTING WATCH

PRICE **£5 : 10 : 0**

This watch is very popular with Yachtsmen. The dial, which is registered, shows at a glance precisely the minutes and seconds yet to elapse before the second gun, so that the yachtsman knows exactly how many seconds there are to elapse before getting into line.

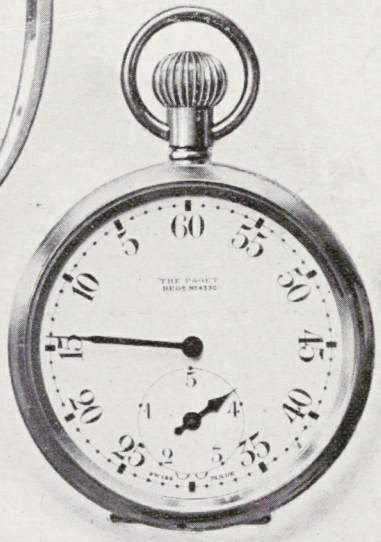
This is an advantage over the ordinary stop watch, as the second's hand travels from 60 down to 1, and the minute hand travels from 5 to 1.

FROM **£5 : 0 : 0**

Yachting Jewellery Cups and Trophies

a Speciality

A large selection always in stock



PRICE **£2 : 10 : 0**

As our firm has had so many enquiries from Yachtsmen and Motor-boatmen for a smaller "Paget," we have produced a baby "Paget" watch, which is slightly larger than a gentleman's ordinary pocket watch.

Money returned if either of these watches are not approved within seven days.

These Watches make very suitable Prizes for Competitions.
